Resource Management Information Systems: Remote Sensing, GIS and Modelling, Second Edition

provides you with the knowledge and skill necessary to design, build, implement, and operate spatial resource management information systems for the management of physical resources. This volume promotes the use of these technologies in a spatial context, enabling you to apply information systems toward the management of resources in agriculture, forestry, land use planning, valuation, engineering, and many additional fields.

A follow-up to the first edition, *Resource Management Information Systems: Process and Practice*, this book offers extensive revisions, reflecting the rapidly evolving nature of the technologies needed to manage spatial resources.
