About this Book...

This companion text to *Introduction to the Reading of Lacan* focuses on the concept of the psychic structures of desire. Using case examples, Dor explains the crucial difference between symptoms which can be phenomenologically grasped and the actual psychic structure of the subject which can be revealed only through the discourse of the patient in the psychoanalytic situation. This work brings life and practicality to a psychoanalytic movement that has been misperceived and divorced from the daily vicissitudes of analytic work.
