Human Performance Models for Computer-Aided Engineering Jerome I. Elkind, Stuart K. Card, Julian Hochberg, Bev Huey

Human Performance Models for Computer-Aided Engineering is a collection of papers that deals with the relationship between scientific theories of human performance and practical engineering. This collection describes the emergence of a scientific engineering paradigm that uses computational theories in computational design aids. This book also considers computational human factors such as human performance models and their application in computer-based engineering designs. This text then presents applications of these models to some helicopter flight problems. This book also explains the four requirements in programming a computer-based model of the sensory performance of a pilot as 1) prediction capability; 2) measurement capability; 3) provision of compatible computer algorithms; and 4) image driven. This collection also describes cognitive structures-aspects of the human information processing system. This text then discusses resource management and time-sharing issues that is related to competition of scarce resources, which can be predictive of the quality of information processing. This book also describes other modeling scenarios such as those predicting human errors, decision making, and shape modeling. This text can prove valuable for computer programmers, engineers, physicists, and research scientists dealing with psychophysics.

From reader reviews:

Michael Pauls:

The book Human Performance Models for Computer-Aided Engineering can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book Human Performance Models for Computer-Aided Engineering? A few of you have a different opinion about book. But one aim that will book can give many data for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or info that you take for that, you may give for each other; you may share all of these. Book Human Performance Models for Computer-Aided Engineering has simple shape however, you know: it has great and big function for you. You can look the enormous world by available and read a book. So it is very wonderful.

Jessica Jennings:

Do you have something that you like such as book? The reserve lovers usually prefer to select book like comic, brief story and the biggest one is novel. Now, why not striving Human Performance Models for Computer-Aided Engineering that give your satisfaction preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the opportunity for people to know world better then how they react in the direction of the world. It can't be claimed constantly that reading routine only for the geeky particular person but for all of you who wants to be success person. So , for all you who want to start reading through as your good habit, you are able to pick Human Performance Models for Computer-Aided Engineering become your current starter.

Patricia Bush:

Reading a book to be new life style in this year; every people loves to learn a book. When you examine a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, and soon. The Human Performance Models for Computer-Aided Engineering will give you a new experience in studying a book.

Randall Wilmes:

Beside this Human Performance Models for Computer-Aided Engineering in your phone, it might give you a way to get nearer to the new knowledge or information. The information and the knowledge you will got here is fresh from your oven so don't always be worry if you feel like an older people live in narrow community. It is good thing to have Human Performance Models for Computer-Aided Engineering because this book offers for your requirements readable information. Do you often have book but you do not get what it's all about. Oh come on, that won't happen if you have this in the hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss this? Find this book as well

as read it from right now!
