Modern Mathematical Methods In Technology (North-Holland Series in Applied Mathematics and Mechanics) S. Fenyo

Modern Mathematical Methods in Technology deals with applied mathematics and its finite methods. The book explains the linear algebra, optimization theory, and elements of the theory of graphs.

This book explains the matrix theory and analysis, as well as the applications of matrix calculus. It discusses the linear mappings, basic matrix operations, hypermatrices, vector systems, and other algebraic concepts. In addition, it presents the sequences, series, continuity, differentiation, and integration of matrices, as well as the analytical matrix functions.

The book discusses linear optimization, linear programming problems, and their solution. It also describes transportation problems and their solution by Hungarian method, as well as convex optimization and the Kuhn-Tucker theorem. The book discusses graphs including sub-, complete, and complementary graphs. It also presents the Boolean algebra and Ford-Fulkerson theorem.

This book is invaluable to Math practitioners and non-practitioners.

Yolanda Ocasio:

The knowledge that you get from Modern Mathematical Methods In Technology (North-Holland Series in Applied Mathematics and Mechanics) may be the more deep you rooting the information that hide within the words the more you get interested in reading it. It does not mean that this book is hard to know but Modern Mathematical Methods In Technology (North-Holland Series in Applied Mathematics and Mechanics) giving you excitement feeling of reading. The author conveys their point in selected way that can be understood simply by anyone who read the item because the author of this guide is well-known enough. This book also makes your personal vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having this Modern Mathematical Methods In Technology (North-Holland Series in Applied Mathematics and Mechanics) instantly.

Marsha Gleason:

The book with title Modern Mathematical Methods In Technology (North-Holland Series in Applied Mathematics and Mechanics) possesses a lot of information that you can learn it. You can get a lot of benefit after read this book. That book exist new information the information that exist in this publication represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. That book will bring you in new era of the internationalization. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Jean Fair:

Is it a person who having spare time subsequently spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Modern Mathematical Methods In

Technology (North-Holland Series in Applied Mathematics and Mechanics) can be the solution, oh how comes? A fresh book you know. You are consequently out of date, spending your spare time by reading in this new era is common not a geek activity. So what these guides have than the others?
