Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications) Calvin C. Moore, Claude L. Schochet

Foliated spaces look locally like products, but their global structure is generally not a product, and tangential differential operators are correspondingly more complex. In the 1980s, Alain Connes founded what is now known as noncommutative geometry and topology. One of the first results was his generalization of the Atiyah-Singer index theorem to compute the analytic index associated with a tangential (pseudo) - differential operator and an invariant transverse measure on a foliated manifold, in terms of topological data on the manifold and the operator. This second edition presents a complete proof of this beautiful result, generalized to foliated spaces (not just manifolds). It includes the necessary background from analysis, geometry, and topology. The present edition has improved exposition, an updated bibliography, an index, and additional material covering developments and applications since the first edition came out, including the confirmation of the Gap Labeling Conjecture of Jean Bellissard.

From reader reviews:

Carlos Quirk:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each publication has different aim or maybe goal; it means that e-book has different type. Some people truly feel enjoy to spend their time to read a book. They are reading whatever they consider because their hobby is definitely reading a book. Consider the person who don't like reading a book? Sometime, person feel need book if they found difficult problem or maybe exercise. Well, probably you should have this Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications).

Arthur Lee:

Here thing why that Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications) are different and trusted to be yours. First of all studying a book is good but it really depends in the content of the usb ports which is the content is as yummy as food or not. Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications) giving you information deeper as different ways, you can find any e-book out there but there is no guide that similar with Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications). It gives you thrill studying journey, its open up your personal eyes about the thing this happened in the world which is maybe can be happened around you. You can bring everywhere like in area, café, or even in your method home by train. In case you are having difficulties in bringing the imprinted book maybe the form of Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications) in e-book can be your alternative.

Raymond McMillion:

The book untitled Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications) contain a lot of information on it. The writer explains your girlfriend idea with easy method. The language is very easy to understand all the people, so do not worry, you can easy to read it. The book was written by famous author. The author gives you in the new time of literary works. It is easy to read this book because you can continue reading your smart phone, or model, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site in addition to order it. Have a nice examine.

Earl Wright:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information from the book. Book is written or printed or outlined from each source in which filled update of news. Within this modern era like today, many ways to get information are available for anyone. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just in search

of the Global Analysis on Foliated Spaces (Mathematical Sciences Research Institute Publications) when you required it?
