Africa Development Indicators 2008/09 (ADI) provides the most detailed collection of data on Africa available in one volume. It puts together data from different sources, making it an essential tool for policy makers, researchers, and other people interested in Africa. This year's ADI addresses the issue of youth employment. The report shows that success in addressing youth employment will not be achieved and sustained through fragmented and isolated interventions. Instead it finds that an overarching guideline for addressing the youth employment challenge is the need for an integrated strategy for rural development, growth and job creation — which covers the demand and the supply sides of the labor market and takes into account the youth mobility from rural to urban areas — combined with targeted interventions to help young people overcome disadvantages in entering and remaining in the labor market. This edition includes the Africa Development Indicators 2008/09 Single User CD-ROM and opening articles from leading economists reporting and analyzing key African economic and development issues.
