Voyagers (Ben Bova Series Book 1) Ben Bova

Ex-astronaut turned physicist Keith Stoner knows that the signals he's picking up at his space station are anything but random. The fiery object heading toward Earth is an alien spacecraft. Yet the world may never know for Keith is trapped in an iron cordon of secrecy: his discovery had shattered the world power balance, setting off a brutal struggle for supremacy that raged within the sacred halls of the Vatican to the corridors of the Kremlin and the Pentagon. The powers that be would use anything at their command - fear and treachery and any other weapon from mind war to sabotage to keep the world in darkness about Stoner's discovery.

With the aid of a brilliant soviet linguist and a lovely young student, Stoner planned a desperate mission, a wild, heart-stopping gamble to preserve the legacy of the star voyager for all mankind.

ABOUT THE AUTHOR

Ben Bova is the author of more than 120 futuristic novels and nonfiction books about science and high technology.

In his various writings, Dr. Bova has predicted the Space Race of the 1960s, solar power satellites, the discovery of organic chemicals in interstellar space, virtual reality, human cloning, the Strategic Defense Initiative (Star Wars), the advent of international peacekeeping forces, the discovery of ice on the Moon, electronic book publishing and zero-gravity sex.

Dr. Bova received the Lifetime Achievement Award of the Arthur C. Clarke Foundation in 2005, "for fueling mankind's imagination regarding the wonders of outer space." His 2006 novel Titan received the John W. Campbell Memorial Award for best novel of the year.

Dr. Bova has been involved in science and high technology since the very beginnings of the space age. President Emeritus of the National Space Society and a past president of Science Fiction Writers of America, Dr. Bova was elected a Fellow of the American Association for the Advancement of Science and has been a member of the Arizona Astronomy Board.

He is a columnist for the Naples Daily News and a widely-popular lecturer. Earlier in his career, he was an award-winning editor and an executive in the aerospace industry. He has worked with film makers and television producers such as Woody Allen, George Lucas, and Gene Roddenberry.

His Grand Tour novels--including his award-winning Titan--show how the human race will expand through the solar system, opening a new era of wealth, opportunity and conflict. His nonfiction books, such as Immortality and Faint Echoes, Distant Star have been honored by organizations such as the American Librarians' Association and the American Association for the Advancement of Science. He has won six Science Fiction Achievement Awards (Hugos) and many other awards for writing.
