Farthing on International Shipping: 1 (WMU Studies in Maritime Affairs) Proshanto K. Mukherjee, Mark Brownrigg

The book provides an introduction to shipping in all its aspects. It is a valuable source of information for students of traditional maritime law as well as for those who seek to understand maritime and shipping services on a global scale. The text includes information and analytical content on national and international practices in shipping, including the age-old dichotomy between freedom in international shipping and the persistent demands of states to control specific maritime areas, as well as the tension between, on the one hand, the desire on the part of sovereign states to regulate and protect their shipping interests and, on the other, the abiding concern and unquestioned right of the international community to regulate the global shipping industry effectively, in order to ensure maritime safety, protection of the environment and fair competition.
