Foodborne Infections and Intoxications: Chapter 11. Listeria (Food Science and Technology) Siyun Wang, Renato H. Orsi

Listeria monocytogenes is an important Gram-positive foodborne pathogen responsible for causing diseases with a high mortality rate in the elderly, pregnant women, neonates, and immunocompromised populations. *L. monocytogenes* is ubiquitously present in nature and has been isolated from various types of foods. It is especially a challenge in ready-to-eat (RTE) or minimally processed foods that support listerial growth. DNA-based detection and molecular subtyping methods provide important resources for tracking *L. monocytogenes* contamination throughout the RTE food chain. Combinations of interventions, such as testing and sanitation of food contact surfaces, control of storage temperatures and periods, and use of growth inhibitors in RTE foods that support *L. monocytogenes* growth are suggested to control *L. monocytogenes* contamination in the RTE food chain. In addition, a better understanding of the ecology and biology of *L. monocytogenes*, with a focus on virulence and stress response systems that facilitate transmission through diverse environments encountered by *L. monocytogenes*, will further facilitate the control of this important foodborne pathogen.

From reader reviews:

Richard Rhone:

In this 21st one hundred year, people become competitive in every way. By being competitive at this point, people have do something to make them survives, being in the middle of the crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yes, by reading a e-book your ability to survive enhance then having chance to stand than other is high. For you who want to start reading the book, we give you this Foodborne Infections and Intoxications: Chapter 11. Listeria (Food Science and Technology) book as starter and daily reading reserve. Why, because this book is greater than just a book.

Lily Pawlak:

This book untitled Foodborne Infections and Intoxications: Chapter 11. Listeria (Food Science and Technology) to be one of several books that will best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit into it. You will easily to buy this specific book in the book retail store or you can order it by way of online. The publisher of this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Cell phone. So there is no reason to you to past this guide from your list.

Rachel Leadbetter:

Reading can called brain hangout, why? Because if you are reading a book specifically book entitled Foodborne Infections and Intoxications: Chapter 11. Listeria (Food Science and Technology) your head will drift away trough every dimension, wandering in most aspect that maybe not known for but surely will become your mind friends. Imaging every word written in a reserve then become one contact form conclusion and explanation in which maybe you never get ahead of. The Foodborne Infections and Intoxications: Chapter 11. Listeria (Food Science and Technology) giving you yet another experience more than blown away your head but also giving you useful info for your better life within this era. So now let us show you the relaxing pattern this is your body and mind are going to be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?

Samuel Ware:

The book untitled Foodborne Infections and Intoxications: Chapter 11. Listeria (Food Science and Technology) contain a lot of information on this. The writer explains your girlfriend idea with easy approach. The language is very straightforward all the people, so do not really worry, you can easy to read the idea. The book was written by famous author. The author provides you in the new era of literary works.
