The Biology of Enlightenment : Unpublished Conversations Of U.G.Krishnamurti After He Came Into The Natural State (1967-71) Rao Mukunda

In this book we meet with the modern sage U.G. Krishnamurti and listen to his penetrating voice describing life and reality as they are. What is body and what is mind? Is there a soul? Is there a God? What is enlightenment? Is there a life after death? Never before have these questions been tackled with such simplicity, candour and clarity. In 1967 UG underwent a transformation, the realization of which came to him sitting on a wooden bench, overlooking the hills of Saanen—the very same that you see on the cover. Preferring to call it the natural state rather than enlightenment, he insisted that any transformation he underwent was within the human body and not in the mind. It is the natural state of being that sages like Buddha, Jesus and Sri Ramana stepped into, and UG never tired of pointing out that ‘this is the way you, stripped of the machinations of thought, are also functioning’.
