In the FAA's *Instrument Procedures Handbook* (#FAA-H-8261-1A) the emphasis is placed on operations and procedural information for real-world use, which makes this the next logical step for pilots after learning basic instrument skills from the *Instrument Flying Handbook* (#FAA-H-8083-15B). Using this book, pilots can more directly apply the concepts to their current flying situation, and learn how their acquired skills are best used in today's IFR environment.

Considered industry-wide as a top source for instrument procedures information and a "must read" for all instrument pilots, this 2007 Edition brings pilots the latest changes to procedures and even more insights and guidance on how to operate safely within the National Airspace System. Detailed information is provided for every navigation receiver and phase of flight on the required precision necessary to stay within protected airspace and to make a successful approach. The text emphasizes airplane operations, and includes a new chapter dedicated to helicopter instrument procedures.

With the increased occurrence of regulatory changes, pilots must be aware of current procedures. This book covers all of the information needed to operate safely within the National Airspace System. In-depth sections on instrument charts and procedures cover all phases of flight from takeoff to landing, including safety of flight issues such as runway incursions and controlled flight into terrain (CFIT). Each topic covered is well-detailed and explained in user-friendly terms, along with full-color depictions to aid understanding.

The *Instrument Procedures Handbook* was intended primarily as a technical reference for professional pilots. However, with the specialized glossary, index, full-color illustrations and photographs, flight instructors, instrument pilots and instrument students alike will find it a valuable training aid. The wealth of information provided in this book is invaluable to everyone who operates under instrument flight rules (IFR).

This FAA Handbook contains straightforward discussions and explanations for:

Detailed coverage of instrument charts

Instrument procedural information for: takeoff, departure, en route, arrival, approach and landing

Human factors

Land and hold short operations (LAHSO)
