**Programming Web Services with SOAP** Doug Tidwell, James Snell, Pavel Kulchenko

The web services architecture provides a new way to think about and implement application-to-application integration and interoperability that makes the development platform irrelevant. Two applications, regardless of operating system, programming language, or any other technical implementation detail, communicate using XML messages over open Internet protocols such as HTTP or SMTP. The Simple Open Access Protocol (SOAP) is a specification that details how to encode that information and has become the messaging protocol of choice for Web services. *Programming Web Services with SOAP* is a detailed guide to using SOAP and other leading web services standards--WSDL (Web Service Description Language), and UDDI (Universal Description, Discovery, and Integration protocol). You'll learn the concepts of the web services architecture and get practical advice on building and deploying web services in the enterprise. This authoritative book decodes the standards, explaining the concepts and implementation in a clear, concise style. You'll also learn about the major toolkits for building and deploying web services. Examples in Java, Perl, C#, and Visual Basic illustrate the principles. Significant applications developed using Java and Perl on the Apache Tomcat web platform address real issues such as security, debugging, and interoperability. Covered topic areas include:

- The Web Services Architecture
- SOAP envelopes, headers, and encodings
- WSDL and UDDI
- Writing web services with Apache SOAP and Java
- Writing web services with Perl's SOAP::Lite
- Peer-to-peer (P2P) web services
- Enterprise issues such as authentication, security, and identity
- Up-and-coming standards projects for web services

*Programming Web Services with SOAP* provides you with all the information on the standards, protocols, and toolkits you'll need to integrate information services with SOAP. You'll find a solid core of information that will help you develop individual Web services or discover new ways to integrate core business processes across an enterprise.

### **From reader reviews:**

#### **Eunice Buckley:**

The e-book untitled Programming Web Services with SOAP is the reserve that recommended to you you just read. You can see the quality of the e-book content that will be shown to an individual. The language that article author use to explained their ideas are easily to understand. The copy writer was did a lot of research when write the book, so the information that they share to you is absolutely accurate. You also can get the e-book of Programming Web Services with SOAP from the publisher to make you more enjoy free time.

#### **Katherine Velasquez:**

People live in this new moment of lifestyle always make an effort to and must have the free time or they will get large amount of stress from both lifestyle and work. So , when we ask do people have time, we will say absolutely yes. People is human not really a huge robot. Then we inquire again, what kind of activity are there when the spare time coming to you of course your answer will certainly unlimited right. Then ever try this one, reading publications. It can be your alternative within spending your spare time, often the book you have read is definitely Programming Web Services with SOAP.

#### **Wesley Baker:**

Playing with family in a park, coming to see the sea world or hanging out with friends is thing that usually you may have done when you have spare time, subsequently why you don't try factor that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Programming Web Services with SOAP, you could enjoy both. It is great combination right, you still wish to miss it? What kind of hang type is it? Oh come on its mind hangout men. What? Still don't get it, oh come on its referred to as reading friends.

#### **Merlin Doyle:**

Do you have something that that suits you such as book? The publication lovers usually prefer to pick book like comic, limited story and the biggest the first is novel. Now, why not hoping Programming Web Services with SOAP that give your entertainment preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the method for people to know world considerably better then how they react to the world. It can't be stated constantly that reading routine only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start examining as your good habit, you can pick Programming Web Services with SOAP become your current starter.
