Comprehensive Textbook of Genitourinary Oncology Peter T. Scardino, W. Marston Linehan, Michael J. Zelefsky, Nicholas J. Vogelzang

Comprehensive Textbook of Genitourinary Oncology was the first major textbook to focus on the field of genitourinary oncology from the combined perspectives of the molecular biologist, pathologist, oncologist and urologist. The first edition of the book had three fundamental goals: 1) to be a textbook that could be read and used by practicing physicians, 2) to be an authoritative textbook for basic scientists, 3) to be an effective interpretation of this field for trainees in surgery, medical and radiation oncology, and pathology. The goals for the 4th edition remain essentially the same. The book takes a systems approach to this field, with sections on prostate, bladder, kidney, testis, and penile cancers, as well as one each on pediatric and other (less common) malignancies. This volume will introduce and distill the combined knowledge and expertise of specialist from a multitude of scientific and clinical disciplines who are internationally recognized leaders in their fields and who themselves have contributed to the field. As in the last edition, authors will be drawn from the fields of urological surgery, medical oncology, radiation oncology, pathology, radiology as well as translational scientists and epidemiologists.
