Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering)

Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering)

This book contains 9 invited keynote and 12 theme lectures presented at the 14th European Conference on Earthquake Engineering (14ECEE) held in Ohrid, Republic of Macedonia, from August 30 to September 3, 2010. The conference was organized by the Macedonian Association for Earthquake Engineering (MAEE), under the auspices of European Association for Earthquake Engineering (EAEE).

The book is organized in twenty one state-of-the-art papers written by carefully selected very eminent researchers mainly from Europe but also from USA and Japan. The contributions provide a very comprehensive collection of topics on earthquake engineering, as well as interdisciplinary subjects such as engineering seismology and seismic risk assessment and management. Engineering seismology, geotechnical earthquake engineering, seismic performance of buildings, earthquake resistant engineering structures, new techniques and technologies and managing risk in seismic regions are all among the different topics covered in this book. The book also includes the First Ambraseys Distinguished Award Lecture given by Prof. Theo P. Tassios in the honor of Prof. Nicholas N. Ambraseys.

The aim is to present the current state of knowledge and engineering practice, addressing recent and ongoing developments while also projecting innovative ideas for future research and development. It is not always possible to have so many selected manuscripts within the broad spectrum of earthquake engineering thus the book is unique in one sense and may serve as a good reference book for researchers in this field.

Audience:

This book will be of interest to civil engineers in the fields of geotechnical and structural earthquake engineering; scientists and researchers in the fields of seismology, geology and geophysics. Not only scientists, engineers and students, but also those interested in earthquake hazard assessment and mitigation will find in this book the most recent advances.

From reader reviews:

Maria Smith:

The book Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the good thing like a book Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering)? Wide variety you have a different opinion about book. But one aim which book can give many facts for us. It is absolutely suitable. Right now, try to closer along with your book. Knowledge or data that you take for that, you may give for each other; you may share all of these. Book Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering) has simple shape however, you know: it has great and big function for you. You can seem the enormous world by start and read a reserve. So it is very wonderful.

Marvin Boyer:

Your reading sixth sense will not betray a person, why because this Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering) reserve written by well-known writer who knows well how to make book that could be understand by anyone who else read the book. Written in good manner for you, still dripping wet every ideas and creating skill only for eliminate your own hunger then you still skepticism Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering) as good book not just by the cover but also by content. This is one publication that can break don't judge book by its protect, so do you still needing another sixth sense to pick this particular!? Oh come on your examining sixth sense already said so why you have to listening to a different sixth sense.

Gilbert Phillips:

As a scholar exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some publication, they are complained. Just little students that has reading's spirit or real their passion. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering) can make you truly feel more interested to read.

Margaret Babin:

What is your hobby? Have you heard this question when you got students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as examining become their hobby. You must know that reading is very important in addition to book as to be the point. Book is important thing to provide you knowledge, except

your own teacher or lecturer. You get good news or update concerning something by book. Many kinds of books that can you choose to use be your object. One of them is niagra Earthquake Engineering in Europe: 17 (Geotechnical, Geological and Earthquake Engineering).
