## **European Colonialism since 1700 (New Approaches to European History) James Lehning**

This masterful synthesis provides a much-needed, complete survey of European colonialism from 1700 to decolonization in the twentieth century. Written by an award-winning author, this advanced undergraduate and graduate level textbook bridges, for the first time, the early modern Atlantic empires and the later Asian and African empires of 'high imperialism'. Viewing colonialism as a phenomenon of contact between Europe and the rest of the world, the author takes an 'entangled histories' approach, considering the surprising ways in which the imperial powers of Spain, Portugal, Great Britain, France and the Netherlands displayed their identities in colonial settings, as much as in their imperial capitals. The author illuminates for students the common themes of colonial government, economic development and cultural contact across empires, and reveals the ways in which these themes played out, through contrast of the differing development, structure and impact of each empire.
