Nicola Bellomo

Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology) Nicola Bellomo

Using tools from mathematical kinetic theory and stochastic game theory, this work deals with the modeling of large complex systems in the applied sciences, particularly those comprised of several interacting individuals whose dynamics follow rules determined by some organized, or even “intelligent” ability. Traditionally, methods of mathematical kinetic theory have been applied to model the evolution of large systems of interacting classical or quantum particles. This book, on the other hand, examines the modeling of living systems as opposed to inert systems. The author develops new mathematical methods and tools—hopefully a “new” mathematics—toward the modeling of living systems. Such tools need to be far more complex than those dealing with systems of inert matter. Specific topics covered include: - Modeling of the competition between cells of an aggressive invasive agent and cells of the immune system; - Modeling of vehicular traffic flow; - Modeling of swarms and crowd dynamics in complex geometric environments; - Methodological aspects related to multiscale modeling of large systems viewed as interconnected subsystems. *Modeling Complex Living Systems* will be a valuable resource for applied mathematicians, engineers, physicists, biologists, economists, and graduate students involved in modeling complex social systems and living matter in general.

From reader reviews:

Angela Powers:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a move, shopping, or went to typically the Mall. How about open as well as read a book titled Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology)? Maybe it is for being best activity for you. You already know beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have additional opinion?

Irene Howe:

The book Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology) gives you the sense of being enjoy for your spare time. You can utilize to make your capable far more increase. Book can to be your best friend when you getting tension or having big problem with the subject. If you can make reading through a book Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology) to become your habit, you can get more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You may know everything if you like open and read a guide Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology). Kinds of book are several. It means that, science e-book or encyclopedia or others. So , how do you think about this reserve?

Eliza Gold:

Do you one of people who can't read pleasant if the sentence chained within the straightway, hold on guys this aren't like that. This Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology) book is readable simply by you who hate the perfect word style. You will find the details here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to supply to you. The writer connected with Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology) content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the written content but it just different in the form of it. So , do you nonetheless thinking Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology) is not loveable to be your top checklist reading book?

Cheryl Bullen:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you can have it in e-book approach, more simple and reachable. This kind of Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology) can give you a lot of friends because by

you checking out this one book you have matter that they don't and make a person more like an interesting person. This kind of book can be one of a step for you to get success. This guide offer you information that might be your friend doesn't know, by knowing more than other make you to be great persons. So , why hesitate? Let me have Modeling Complex Living Systems (Modeling and Simulation in Science, Engineering and Technology).
