Project Management for the Creation of Organisational Value

Ofer Zwikael, John Smyrk

Project Management for the Creation of Organisational Value Ofer Zwikael, John Smyrk

Projects and programmes are approved and funded to generate benefits. *Project Management for the Creation of Organisational Value* proposes a complete framework that seeks to support such an objective – from project selection and definition, through execution, and beyond implementation of deliverables until benefits are secured.

Because it is preoccupied with deliverables, accepted project management practice is flawed. *Project Management for the Creation of Organisational Value* proposes an alternative approach, which seeks a flow of target outcomes for the organisation investing in the project.

Project Management for the Creation of Organisational Value provides support for all those who play a role of leadership in projects at different levels. Senior executives, practitioners and academics will find in this book a comprehensive guide to the conduct of projects and programmes, which includes robust models, a set of consistent principles, an integrated glossary, enabling tools, illustrative examples and case studies.

A companion workbook to this text for instructors and students is available online at <http://extras.springer.com>. The workbook illustrates project management concepts using the approach presented in this book and contains a range of exercises.
