Radio Network Planning and Optimisation for UMTS

Radio Network Planning and Optimisation for UMTS

Radio Network Planning and Optimisation for UMTS, Second Edition, is a comprehensive and fully updated introduction to WCDMA radio access technology used in UMTS, featuring new content on key developments. Written by leading experts at Nokia, the first edition quickly established itself as a best-selling and highly respected book on how to dimension, plan and optimise UMTS networks. This valuable text examines current and future radio network management issues and their impact on network performance as well as the relevant capacity and coverage enhancement methods.

In addition to coverage of WCDMA radio access technology used in UMTS, and the planning and optimisation of such a system, the service control and management concept in WCDMA and GPRS networks are also introduced. This is an excellent source of information for those considering future cellular networks where Quality of Service (QoS) is of paramount importance.

Key features of the Second Edition include:

- High-Speed Downlink Packet Access (HSDPA) – physical layer, dimensioning and radio resource management
- Quality of Service (QoS) mechanisms in network for service differentiation
- Multiple Input – Multiple Output (MIMO) technology
- Practical network optimisation examples
- Service optimisation for UMTS and GPRS/EDGE capacity optimisation
- The ‘hot topic’ of service control and management in WCDMA and GPRS networks, that has evolved since the first edition

Companion website includes:

- Figures
- Static radio network simulator implemented in MATLAB®

This text will have instant appeal to wireless operators and network and terminal manufacturers. It will also be essential reading for undergraduate and postgraduate students, frequency regulation bodies and all those interested in radio network planning and optimisation, particularly RF network systems engineering professionals.

From reader reviews:

Heather Bencomo:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each e-book has different aim or goal; it means that publication has different type. Some people experience enjoy to spend their a chance to read a book. They are reading whatever they take because their hobby is reading a book. Consider the person who don't like reading through a book? Sometime, man or woman feel need book whenever they found difficult problem or exercise. Well, probably you will need this Radio Network Planning and Optimisation for UMTS.

Steve Teegarden:

Information is provisions for people to get better life, information today can get by anyone in everywhere. The information can be a understanding or any news even restricted. What people must be consider whenever those information which is from the former life are challenging to be find than now could be taking seriously which one is appropriate to believe or which one the resource are convinced. If you find the unstable resource then you get it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take Radio Network Planning and Optimisation for UMTS as the daily resource information.

Conrad Degregorio:

Reading a book being new life style in this year; every people loves to read a book. When you examine a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these kinds of us novel, comics, and soon. The Radio Network Planning and Optimisation for UMTS provide you with a new experience in studying a book.

Jessie Taylor:

E-book is one of source of information. We can add our knowledge from it. Not only for students but also native or citizen need book to know the revise information of year to year. As we know those publications have many advantages. Beside we all add our knowledge, also can bring us to around the world. Through the book Radio Network Planning and Optimisation for UMTS we can consider more advantage. Don't that you be creative people? For being creative person must want to read a book. Just simply choose the best book that suited with your aim. Don't become doubt to change your life with that book Radio Network Planning and Optimisation for UMTS. You can more inviting than now.
