## Museum Ethics: Theory and Practice (Heritage: Care-Preservation-Management)

A number of developments in the museum movement during the last few years have forced museums to give greater attention to ethical issues. Members of a profession are increasingly regarded constituting an ethical community. Every person with such a community must have a sense of personal obligation as well as a responsibility for others to assure ethical achievement. This volume firmly places notions of ethics in the field of action.

*Museum Ethics* considers the theoretical and practical elements of the philosophy of conduct in relation to critical contemporary issues and museums. This discussion encompasses the procurement of artifacts, the rights of indigenous peoples, repatriation, the politics of display, the conservation of objects and the role of education, as well as the day-to-day management of a museum. All persons active in museum matters, whether custodian, curator, or trustee have an ethical obligation to the museum profession and the public. This volume will allow the professional and student to work towards a more responsible and responsive museum community.
