## **Ship (Objekt)** Gregory Votolato

Ships are perhaps the most important mode of transportation ever invented. From oar-powered quinqueremes, to steam-powered freighters, to luxury ocean liners such as the QE2 and QM2 to aircraft carriers like the Abraham Lincoln, throughout history ships have played an integral role in trade, transportation and war. Today, ships remain the largest and most expensive moving objects on the planet; engineers and designers constantly push the limits of design, creating vessels that continue to challenge newer technologies such as aeroplanes and cars. But for all of our knowledge about ships acquired from movies, photographs and literature, most of us never actually see really large ships in real life. Unlike cars, trains and airplanes, the great ships of the world travel in the deep oceans, out of sight and out of mind – until, that is, something goes wrong. In *Ship*, Gregory Votolato explores the fiction and the reality of modern ships, the technology that creates them, and the events that can lead to disasters such as the Titanic or Exxon Valdez. Votolato delves into the world of the ship, describing the unpredictable and often-hostile environment of the oceans and the weather, the threat of piracy and the captains and crews responsible for ships at sea. *Ship*'s broad overview of technology and design offers unique insights and shows how our ideas about ships do not always reflect the reality of these extraordinary products of human creativity. Votolato's book will appeal to mariners, as well as those who are interested in ships and their social, political and technological impact on our modern world.

### From reader reviews:

#### James Williams:

What do you with regards to book? It is not important together with you? Or just adding material when you really need something to explain what the ones you have problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to complete others business, it is make you feel bored faster. And you have free time? What did you do? Everybody has many questions above. They must answer that question simply because just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need that Ship (Objekt) to read.

#### William Holt:

As people who live in typically the modest era should be revise about what going on or facts even knowledge to make these people keep up with the era and that is always change and progress. Some of you maybe will update themselves by reading through books. It is a good choice for you but the problems coming to you is you don't know what kind you should start with. This Ship (Objekt) is our recommendation to make you keep up with the world. Why, because book serves what you want and wish in this era.

#### Janice Pyles:

Ship (Objekt) can be one of your basic books that are good idea. Most of us recommend that straight away because this guide has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The author giving his/her effort to get every word into pleasure arrangement in writing Ship (Objekt) however doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource info that maybe you can be considered one of it. This great information can easily drawn you into completely new stage of crucial imagining.

#### Rebecca Muldoon:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book was rare? Why so many issue for the book? But any people feel that they enjoy with regard to reading. Some people likes reading, not only science book and also novel and Ship (Objekt) or maybe others sources were given know-how for you. After you know how the truly great a book, you feel want to read more and more. Science e-book was created for teacher or perhaps students especially. Those textbooks are helping them to add their knowledge. In some other case, beside science e-book, any other book likes Ship (Objekt) to make your spare time much more colorful. Many types of book like this.
